REACT

WORK EXPERIENCE

Role Model

Code To The Future / October 2019 - July 202 / Anaheim, CA

- Teach a classroom full of students(2nd-8th grade) to build their own video games and play chess. This helps raise critical thinking creativity, memory, focus, problem solving, communication and collaboration skills.
- Logged every students progress in order to assure the students are being challenged and can work to their goals.
- Created my own curriculum that taught students the fundamentals of scratch website to create games.

PROJECTS

Covid-19 Website

Creator

- Goal of the website was to display covid data at a local level and allowed users to register and create useful posts for everyone to see
- Built with REACT, and used REACTJS charts to display case numbers and other information
- Google Firebase was used to create user accounts/authentication
- Google Firestore handled storing user post and replies.

Front-end Twitter Clone

creator

- Fully responsive Front-end twitter clone website that allows you to login and scroll through news feed.
- Developed using HTML/CSS and javascript.

DVD Rental Website

creator

- Responsive website using Bootstrap 4 that allows users to register and rent/search movies, write reviews and also rate movies.
- used: Bootstrap4, PHP, MySQL.
